LINEA SHAPE & FLAT

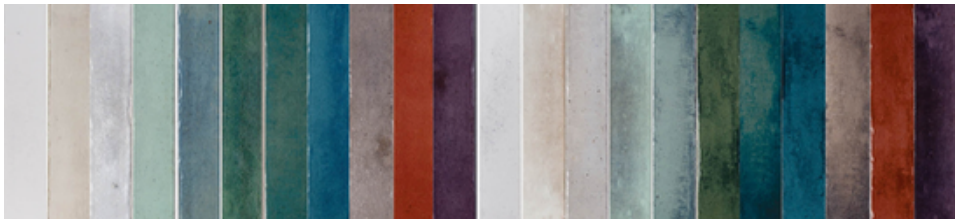

The 3D shapes represent a new generation of ceramic facade profiles, combining classic brick aesthetics with modern architectural clarity.

LINEA FLAT and LINEA SHAPE offer architects and planners a wide range of design possibilities – from clean, precise facades to expressive surfaces for high-quality interior and exterior spaces. The thoughtfully designed profile system combines contemporary design with the proven quality of ceramic surfaces.

CUSTOM SHAPES

Every construction project has its own requirements for facade design. That is why, alongside our proven standard shapes, we also develop and manufacture custom ceramic profiles tailored to your vision – from extraordinary geometries and distinctive textures to striking contours that transform your architectural ideas into unique design elements.

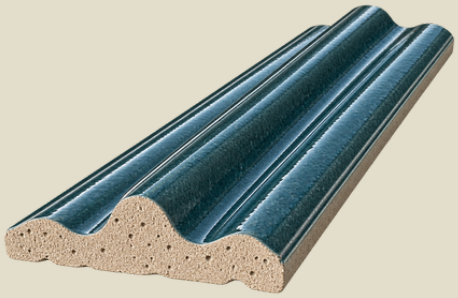

NEW WAVE

CUSTOM SHAPE

NEW WAVE is an example of how individual CUSTOM SHAPES can transform architectural facades. Its striking three-dimensional wave structure, with peaks of varying heights, creates a dynamic surface that produces a fascinating interplay of light and shadow depending on the angle of light. Soft curves and flowing lines add depth and a distinctive character to the facade.

New Wave
Format: 360 × 60 mm
Profile: Distinctive wave shape
Application: Interior and exterior use

LIMITLESS POSSIBILITIES

At TONWERK-KLINKER, we combine technical precision with creative freedom. As a manufacturer, we offer a wide range of possibilities to develop and produce ceramic brick slips tailored to your vision. From proven product ranges to custom-made special shapes, we bring your ideas to life through our expertise and manufacturing capabilities. The result is facade solutions that give architecture a distinctive identity.

VERSATILE DESIGN, STRONG CERAMICS

The low-porosity material is ideal for long-lasting facades while offering design flexibility for residential and commercial buildings.

DURABILITY AND MINIMAL MAINTENANCE

Ceramic facade cladding is designed to withstand the elements and maintain its flawless appearance over the long term with minimal maintenance.

ENERGY-EFFICIENT FACADE SOLUTION

TONWERK LINEA is more than just an aesthetic facade cladding solution; it also contributes to the building's energy efficiency and thermal insulation.

STANDARD RANGE WITH FLEXIBILITY

- Colour-wise, TONWERK LINEA offers maximum flexibility: colours can be specified according to NCS or RAL and customised for individual projects, allowing facades and interiors to be perfectly tailored to your design concept.
- Glazed long edge available on request.
- 21 standard colours, special colours available on request.
- TONWERK LINEA profiles, with a water absorption rate well below 3%, can be used with all external thermal insulation composite systems (ETICS).
- STANDARD SHAPES
  LINEA FLAT: Lengths from 210 to 468 mm
  LINEA SHAPE: Lengths from 210 to 360 mm
  Standard lengths: 240 mm | 290 mm | 360 mm | 468 mm
  Standard heights: 52 and 71 mm; custom heights available on request.
